RIO 580 Cabin

RIO 580- the unsinkable boat that realize the ideal states to obtain the double-end Speed/comfort: the dynamics line of the boat functionally get married to the internal spaces where at stern there is one elegant, spacious sun-bathing mattress; at bow two beds with toilette.

Then RIO 580 effectively interpret the roll of the day-boat and at the same time of the miny-cruising boat, while the power of motors allow the full use of the speed.
