RIO 68 SPORTYACHTS

Upscaling

With this new project designed by Marino Alfani, **Rio Yachts** will make its entry into the world of sportyachts over 20 metres. Very aggressive but equally elegant, this boat represents a fly' just a little bit longer than most of its competitors, which can be protected by a soft top. As current trends demand, the entire front part of the boat is fitted out with a very large lounging area accompanied by a huge sunpad. The architecture of the dining area, situated in the cockpit above the

tender garage, will also provide a second sunning area, this one a little more protected from the wind. For the interior decoration, the manufacturer intends to progress well in the universe of luxury by choosing such recognized brands as Antolini for the marble and Armani Casa for the furniture. No 'pods in the program' – the Italian manufacturer remains faithful to an in-line shaft transmission linked to two Caterpillars outputting 1,150 horsepower each.

Length: 21.72 m / **Beam:** 5.30 m
Displacement: 35 t
Fuel: 5,000 l / **Water:** 800 l
Engines: Caterpillar C 18
Power: 2 x 1,150 hp
Designer: Marino Alfani
